

# The Future of Smart Cities Sheetal King Premium

## The Sheetal Saga

Sheetal, one of the leading brands of India is an industry leader in water storage tanks/ chemical tanks, pipes and solid waste management category. Known for quality, durability and innovation, Sheetal has many unique distinctions like holding an ISO 9001:2008, BIS(IS:12701), MSME & NSIC certification and being a registered vendor of DGS & D and Indian Railways. We have been making specialist water storage tanks for over 25 years using latest technologies. We're proud of our products and we expect every Sheetal Tank to perform exactly as promised. One can choose quality and style with our range of products, designed for superior performance and peace-of-mind.

“ At every opportunity our team is researching and creating new and improved products that LOOK GOOD and WORK BETTER. ”

“ Sheetal Tanks last longer because they are definitely stronger. ”

### King Plus & King Premium

These are high quality, innovative and trendy water tanks made of rough textured Polyethylene blow mould technology. These ultra strong tanks are engineered to last and compliment every landscape with their contemporary look. They won't crack, rust and their one-piece construction makes them exceptionally strong and easy to clean.

#### Distinctive Features:

- ▶ Economical
- ▶ Extra safe food grade certified polyethylene
- ▶ UV-stabilized to withstand the harsh sun
- ▶ Insect Free & Dust-Free
- ▶ Extra Strong and Durable
- ▶ Keeps Water Pure for Longer
- ▶ Coarse Texture on Outer Layer
- ▶ Weather-Proof
- ▶ Anti-Rust
- ▶ 5 Years Warranty\*

\*Against manufacturing defects only

“ Quality that stays ”

## THE PROCESS

# How are they made?

Technology that leads

Blow Moulding is the latest manufacturing technology that is used by Sheetal to make these King Plus & King Premium Tanks. The blow moulding process begins with melting down the plastic and forming it into a parison. The parison is a tube-like piece of plastic with a hole in one end through which compressed air can pass. The parison is then clamped into a mould and air is blown into it. The air pressure then pushes the plastic out to match the mould. Once the plastic has cooled and hardened the mold opens up and the part is ejected. These tanks are a perfect example of high quality, strength & durability.

Specifications of Sheetal King Water Storage Tanks			
Capacity in Litres	Outer Dia. (mm)*	Over all Height (mm)*	Man Hole Dia. (mm)*
500	870	1060	400
750	950	1300	400
1000	1105	1340	400
2000	1390	1720	400
